Managing Director, Consulting
Europe

+44 (0) 1623 272550

Implementing Operational Excellence, Lean and Six Sigma since 2004, Vincent has experience in both production and office environments. He has a passion for Lean and Business Excellence and has extensive experience of Strategy Deployment, Change Management and Business Process Improvement.

Vincent started his career in the automotive industry at DAF trucks developing advanced vehicle systems; including hybrid electric drive systems for General Motors in the US. Whilst working at Delphi

Automotive and Remy Automotive Europe, he held various positions with responsibilities for product development, manufacturing engineering, quality assurance and production.

Before joining TBM in 2013, he was the Lean Program Director for SCA packaging, designing and overseeing a Lean implementation program for SCA's 150 European locations training over 1,100 employees and significantly impacting the bottom line.

Vincent has degrees in mechanical engineering and electrical engineering from the Technical University Eindhoven.

A Dutch national, he also speaks English, German and French.
